

ŠARŪNAS GRABAUSKAS

FRONT END DEVELOPER

PERSONAL PROFILE

I really enjoy coding - constantly facing problems and finding solutions become an excellent motivation for me - it seems like a never-ending process, which drives me forward to improve every day.

Recently I finished Code Academy front-end full stack course (480 hours).

I would be thrilled to start my carrier in programming and to continue on the journey I started. So I am looking for new opportunities as an entry-level front-end developer or internship position.
